About Us

COMPANY OVERVIEW

Bajaj Tubular Products has been in the steel raw materials market since 2006. What started as a family business in Pune, turned into a renowned brand through effective strategies, all of which had a sole purpose of delivering high quality products at competitive rates. Over the last decade and a half, we have grown into an established and trustworthy brand that supplies essential raw materials to industries and infrastructure builders in and around Pune.

We provide industry grade MS ERW Pipes, Seamless Pipes, ERW Square and Rectangular Tubes made from the finest steel.

MISSION

We at Bajaj Tubular Products, strive to ensure that the machinery and equipment which help build the cities and towns of Maharashtra, always run smoothly. Our aim is to be at the forefront of the raw materials industry, so we can keep contributing to the nation's industrial success and the comfort of our fellow citizens.

VISION

Through our sound knowledge and long standing experience with various machineries and infrastructure development tools, we aim to spread our wings across India. To achieve this, we lay utmost emphasis on building unfaltering trust with our customers and working everyday to deliver a service that exceeds their expectations.

CORE VALUES

We believe in working closely with our customers, understanding their exact needs and laying out the best possible solutions for them. Our prime focus is on quality and performance. Any raw material that passes through our supply chain is tested to perfection. Our raw materials are the life inside industrial machinery, and when it comes to life, there are no compromises.
